

ADDITIONAL LEARNING

Language Learning

You can learn a new language

Rosetta Stone is the number one language-learning software in the world, used successfully by millions of people in 150 countries. After running a successful 12 month trial of the software, we have now officially added this amazing product to our e-learning portfolio.

With Rosetta Stone, you can learn a new language the way you learned your own native language, without translation or memorisation.

Native speakers, real-life images, speech recognition and fully interactive software teach you like you learned your first language – naturally.

Rosetta Stone teaches languages through a step-by-step sequence of carefully structured lessons, called Dynamic Immersion™. Each of the languages contain: 20 activities in each of 92 lessons; previews, comprehensive exercises and testing for each lesson; and automated tutorials that “learn” where you need extra help.

New words become associated with familiar objects, actions, and ideas. Words build to phrases and sentences in a systematic progression through listening, reading, speaking and writing.

Getting started

To register for language training or to find out more information please contact the DELC helpdesk on 0845 330 9643 quoting your name, e-mail address and language.

We have a limited number of course licences, which will be issued for a six month period. Please ensure that all your details are correct when registering.
